

Cough Assist Respironics Cough Assist T70

Effective, More Comfortable Way to
Clear the Airway

Cough Assist T70 is a noninvasive therapy that removes secretions in patients with an ineffective ability to cough. It is easy for patients and caregivers to operate and can be used with a face mask, mouthpiece or with an adapter to a patient's endotracheal or tracheostomy tube.

“Unicare understands our needs and is always offering alternative therapies to get the result we want. They are always two steps ahead of us!”

Diaz Family, San Diego, CA

Unicare - Your Partner in Health

Cough Assist T70, also known as a mechanical insufflation-exsufflation device, simulates a natural cough. It gradually delivers a large volume of air to your lungs when you breathe in (positive pressure). Once the lungs have been expanded (similar to a normal deep breath), the device quickly reverses the flow to pull secretions out (negative pressure). And, Cough Assist T70 helps keep your airways clear to reduce the chance of recurring respiratory infections with your own breathing patterns.

Cough Assist T70 Features:

Operating Temperature: 5°C to 35°C

Relative Humidity: 15% to 95% (non-condensing)

Atmospheric pressure: 101 kPa to 77 kPa
(approximately 0-7500 ft)

Weight: 3-8 kg (8.4 lbs)
4.3 kg (9.4 lbs)

Size: 29.2 cm Wx23.1cm Hx19.0cm D
(11.5" W x9.1" H x 9.5" D)
